Tough cleaning lineup

Penray's Tough Max multipurpose cleaning products are formulated to remove grease, oil and grime from tools and parts, as well as for cleaning dirty hands, all while leaving a fresh citrus scent. The noncorrosive Purple variation is suitable for commercial use without fear of pitting

or discoloration on nearly any nonporous or semi-porous surface. The products work without water and are solvent-free, will not scratch or harm surfaces, require no rinsing and leave no residue. They are phosphate-free and nonflammable and can be diluted with as much as 95 percent water. The liquid concentrate is available in 32-ounce trigger spray bottles, 5- and 10-gallon pails and a 55-gallon drum.

Tracker bar extension

Phillips' X-Tend tracker bar extension is designed to prevent scuffs and marring on the back of the cab from swinging cables. The device extends the tracker spring kit and cables out an additional 8 inches from the tracker bar, for a total of 12 inches away from the back of the cab. The nylon support bracket is engineered to rest against the back of the cab, eliminating the need for installation hardware, and a soft cushion of foam gasket padding on the back of the bracket helps prevent damage to the cab's surface. Both the mounting and support brackets are made of noncorrosive materials, and the metal tubing and eye hook are constructed of stainless steel for added durability and corrosion resistance.
