Engine oils

Shell's Rotella T4 NG Plus 15W-40 heavy-duty engine oil is formulated to provide protection under the full range of pressures and temperatures in mobile natural gas engines, as well as in diesel and gasoline engines. Also, the company's Rotella T6 Full Synthetic 0W-40 heavy-duty diesel engine oil now is licensed for the API CK-4 service category and is designed for advanced engine technologies in both on- and off-road vehicles and equipment.

Long-haul drive tire

Roadmaster's RM852 EM long-haul drive tire is engineered by Cooper and has 30/32nds of tread depth, 3D microgauge siping and a solid shoulder design for added traction in challenging weather conditions. The SmartWay-verified tire's tread lugs are designed to resist squirm and promote even wear, and its tread compound is formulated to provide longer miles to removal.

Cordless ratchet

Snap-on's 14.4-Volt Hex Drive Long Neck Cordless Ratchet has a low tapered head and a 13¼-inch length designed to provide added reach and accessibility. The tool features 35 ft.-lbs. of torque output, 46 ft.-lbs. of manual torque load and a variable trigger speed to help tackle tough fasteners. Battery life can be monitored with the fuel gauge, and an LED headlight and an over-molded cushion grip both help facilitate comfortable use.

Improved electrical, air assemblies

Phillips has redesigned its Premium 3-In-1 and 4-In-1 Electrical and Air Combination Assemblies with QCP Trailer Side Connections to help reduce fatigue and strain on the plug and 7-way electrical cable that can be experienced on some trailer applications where the electrical connection is higher than the air connections. The trailer side lead on the 7-way electrical cable now extends out an additional 6 inches, and the spiral wrap on the same side is reduced by 6 inches, creating more slack on the 7-way cable and relieving strain placed on the cable lead and coupled 7-way electrical connection due to pull from the weight of the combination assembly. The extended length also allows for more rotation in the lines during a jackknife.
