Goodyear details Endurance RSA tire

Goodyear highlights its new Goodyear Endurance RSA tire, which the company says is geared toward regional and urban delivery fleets, offers benefits ranging from long miles to removal and traction to fuel efficiency and retreadability. The company adds the tire offer more miles to removal—plus lower rolling resistance and more resistance to curb impact damage—than its predecessor, the Goodyear G661 HSA. Other features include: Goodyear steel casing with super-tensile steel belts for extra toughness and durability; a dual-layer tread compound for improved fuel economy and greenhouse gas compliance; and a premium casing for optimal retreadability. The Endurance RSA is available in size 11R22.5, Load Ranges G and H.

Phillips Industries releases Permalogic Smart-Charge

Phillips Industries has introduced the Permalogic Smart-Charge trailer power management system for liftgate and auxiliary battery banks, which recognizes and automatically manages the best power sources to charge batteries from all available sources collectively at the same time.

The system can pull collectively from all available sources. It can also pull from the following sources individually or collec-

tively: the dual/single pole liftgate charging system; the tractor batteries; the reefer; and even from a fourth source such as solar power, the company said.

Mainstay introduces CNG fuel storage, delivery system

Mainstay introduces its back-of-cab on-board CNG fuel storage and delivery system. Utilizing Type IV cylinders and related

technology, the systems have wide range capabilities, allow for faster, more efficient fills and incorporate robust safety features, the company explained.

- Stored capacity: 165 DGE;
- Range in miles from 650–800;
- Frame design and tank array offers balance of weight and durability; and
- Narrow profile reduces required rail space. /

MUELLER KUEPS
German Automotive Tool Innovator

Universal Press Support

432 650

- Almost endlessly adjustable to align irregularly shaped objects, like wheel bearing housings.
- Creates three points of contact for stability.
- Makes shop press safe and easy to use.
