ELD Rule Finalized

Industry reacts to logging
mandate *pg. 14*

PHILLIPS INDUSTRIES has updated its Corrosion Prevention Tips poster, which outlines 11 tips that the company said can prevent corrosion build-up in truck and trailer air and electrical systems. Moisture and harsh road de-icing chemicals can cause costly damage to electrical and air connections as well as to the electrical system. "Through extensive testing, Phillips Industries has developed products and the expertise to help fleets substantially reduce the harmful effects of corrosion," according to the company.
