Various replacement parts

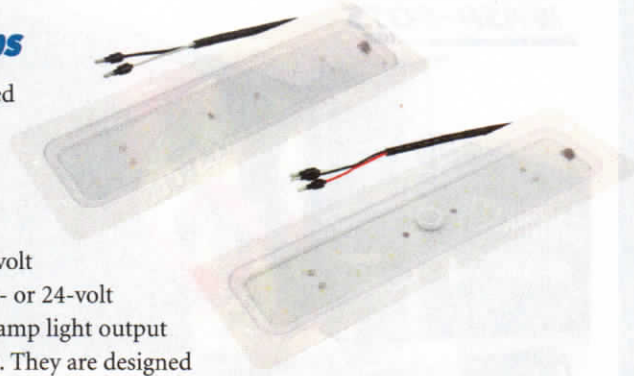

PAI Industries has added more than a dozen new products to its heavy-duty aftermarket product offering.

The new parts include flasher signals, an air solenoid valve, control throttle, air spring, grille bezel, tachometer, cab lift pump, intercooler core, cab air filter, transmission oil pump, clutch release yoke, exhaust valve, oil pan, check valve, exhaust manifold hardware kit and accessory drive shaft.

Trailer dome lamps

Phillips Industries has released brighter and more efficient trailer dome lamps, with or without motion sensors, for commercial trailers.

The new lamps are multi-volt allowing them to run on a 12- or 24-volt system, and offer consistent lamp light output throughout the voltage range. They are designed to work in extreme temperatures of -40°F to 176°F (-40°C to 80°C) and a silicone seal protects components under the lens from moisture build up.

Expanded turbocharger line

PurePower Technologies has expanded production of its turbocharger product offerings to include turbochargers for light-, medium- and heavy-duty truck engines.

Offering assembly, remanufacturing

and test lines for high-volume OEM-quality turbochargers, PurePower Technologies says it uses a modular approach for an assortment of all makes, sizes and model engines including wastegate and variable geometry turbochargers.

CALCULATE YOUR MPT SAVINGS.

IDEAS DRIVING RESULTS

CONTINUOUS TIRE INFLATION FOR
CONTINUOUS TIRE SAVINGS.

Maximizing your MPT™ – miles per tire – is essential. And Meritor® is the MPT leader. Our Meritor Tire Inflation System (MTIS™) by P.S.I. extends tire life by up to 10 percent. And our ThermALERT™ option adds protection from wheel-end overheating. When you total all the benefits, MTIS can pay for itself in under one year. Visit our online MTIS payback calculator at MeritorCYA.com.
