Loop Energy Secures Investment From Cummins

Loop Energy, a provider of hydrogen fuel cell electric range extenders for medium- and heavy-duty trucks and buses, announced it received a cash investment from independent engine maker Cummins Inc.

Loop Energy also will supply Cummins with range extender systems for incorporation into

demonstration trucks.

"This new investment by Cummins is solid evidence of the traction we are gaining in the market through investments, customer orders and vehicle-demonstration programs," Loop Energy CEO Ben Nyland said in a release.

Vancouver, British Columbia-based Loop did not disclose the

amount of the investment.

"Cummins is investing in a broad

portfolio of power solutions, including advancements in hydrogen fuel cell technologies and the electrifica-

tion of commercial applications," said Thad Ewald, vice president of corporate strategy. "This investment is continued evidence of our commitment to next-generation trucking technologies, and we look forward to working with Loop Energy to further validate the provision of zero-emissions fuel cell range extenders for customers."

PCT Unveils New Devices For Tracking

Phillips Connect Technologies has unveiled two tracking devices intended for a trailer or chassis.

EZTrac and EZTrac Plus pinpoint locations via nationwide 4G cellular LTE networks. They are available in the aftermarket exclusively through Aurora Parts & Accessories, New Life Transport Parts Center and Utility Trailer Dealers, according to the Santa Fe Springs, Calif.-based company.
