

QWIK-CHANGE™

PAK
POWER AIR KIT

Anodized Gladhands with Large Rubber Grip

- Factory-installed gladhands are anodized for added strength and corrosion resistance
- Large rubber grips allow for easy coupling and uncoupling and act as cable strain relief to protect against kinking/tearing

QWIK-CLAMP™

- Corrosion-resistant and allows for quick cable adjustments in seconds without the use of tools
- Securely locks in place without damaging hoses, cables, or combo assemblies
- Latch is designed and tested to prevent accidental or unexpected release, which can cause damage to lines and other tractor components

QCP™ (Quick-Change Plug) with Cable Guard

- Quick-change plug can be serviced in under 2 minutes
- Replaceable plug insert eliminates re-wiring, reducing downtime and replacement costs
- Completely molded plug and weather-proof housing protects against corrosion
- Cable guard added to trailer side for stress relief and cable support

25" Extra Heavy-Duty Springs

- Designed to properly support the weight of air and electrical lines
- Extra length provides more stretch to prevent springs from being overstretched in extreme jackknife situations
