

STA-DRY® STEP-DOWN CRIMP & SEAL™

MAKE PERMANENT REPAIRS LAST AS LONG AS THE WIRE!

Has two stripes - one on each end - to indicate which wire size to insert, and which crimp die to use

THEIRS:

OURS!

Has a color stripe to indicate where the smaller size of wire is inserted. However, it must be crimped in the larger crimp die. For example, on their connector for 14-16 to 10-12AWG, the BLUE stripe indicates the side where a 14-16 AWG wire is to be inserted. However, it must be crimped in the YELLOW crimp die.

CONFUSING!

Has two stripes - one on each end - to indicate which wire size to insert. Plus, the stripe matches the crimp die that needs to be used. For example, the blue stripe indicates the side where a 14 or 16AWG wire is to be inserted, and it will be crimped in the blue crimp die.

MAKES SENSE!

Step-Down Connectors

Part No.	Color	Gauge	Side 1 ga.	TO	Side 2 ga.	Qty.
1-1728	Blue	16-14	22-18		16-14	10
1-1727	Yellow	12-10	16-14		12-10	10
1-1726	Red	8	12-10		8	10

CLEAR-VU™ Window Step-Down Connectors

Part No.	Color	Gauge	Side 1 ga.	TO	Side 2 ga.	Qty.
1-1618	Clear	16-14	22-18		16-14	25
1-1617	Clear	12-10	16-14		12-10	25
1-1616	Clear	8	12-10		8	25

FOR CONNECTING A LARGER WIRE TO A SMALLER WIRE

THEIRS:

The outside diameter of the butt connector is the same on both ends and only the inside diameter is adjusted for the different wire gauge. This means that the side for the smaller wire has a much thicker wall than normal and is extremely difficult to crimp.

POTENTIAL FOR WIRE PULLOUT!

OURS!

We vary the inside AND the outside diameter of the connector which means that both sides will make a positive crimp.

STRONG MECHANICAL TERMINATION!
