

PHILIPS

THE STRONGEST CABLE WITH CONTINUOUS LIFE... For an uninterrupted ride!

Anatomy of a QCP™ (Quick-Connect Plug)

Replaceable Plug Insert

- Replaceable in under 2 minutes
- Glass filled nylon material to withstand tough impacts
- Spring wrapped pins to retain a tight fit
- Floating brass pins for secure installation of misaligned sockets
- Pre-injected with dielectric grease for extra corrosion protection
- **Recommended Practice:** Replace at first signs of corrosion

Molded Interior Plug

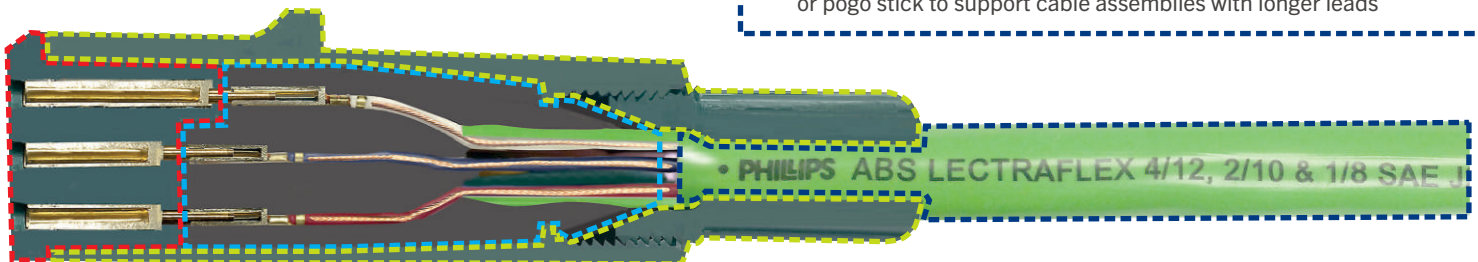

- Durable PVC overmold seals inner wires and cable to lock out corrosion
- Molded wiper rings keep contact pins dry
- Inner pins are also wrapped to retain a tight fit
- Pre-injected with dielectric grease for extra corrosion protection
- Completely sealed against rear entry water intrusion
- **Recommended Practice:** Clean connection and apply dielectric grease before inserting a new plug insert

Plug Housing

- Unbreakable, non-corrosive nylon housing that resists impact
- Large finger grips for easy coupling/uncoupling
- **Recommended Practice:** When replacing the insert, pull housing back and clean all connections well

Electrical Cable

- LECTRACOIL™ Assemblies
 - Excellent recoil memory
 - Resistant to chemicals & abrasion
 - Flexible from -82°F to 195°F (-63°C to 91°C)
- LECTRAFLEX™ Assemblies
 - Resistant to chemicals & abrasion
 - Flexible from -40°F to 150°F (-40°C to 66°C)
- PERMACOIL™ Assemblies
 - Great recoil memory
 - Resistant to chemicals & abrasion
 - Flexible from -87°F to 150°F (-66°C to 66°C)
- **Recommended Practice:** Use a tracker bar spring kit or pogo stick to support cable assemblies with longer leads
