

110W Liftgate Kit

AVAILABLE NOW
PN: 79-91382

Introducing a groundbreaking solar technology with patented flexibility and lightweight Mono cSi panels. These panels, **50% more durable than standard alternatives**, redefine reliability in renewable energy. The advanced technology not only saves fuel but also eliminates jump starts, extends battery life, and increases power to offset parasitic loads. Embrace a new era of efficient and sustainable energy solutions.

TECHNOLOGY

Industry-leading Power Output | Enhanced Performance Under all Light Conditions | Designed and Engineered in USA | Outstanding Aesthetics | Redundancy by Design | Robust Module Integrity and Performance Under Extreme Conditions | Military Grade Design, Materials and Approvals

PRODUCT FEATURES

Peel & Stick Easy to Install Heavy Duty Solar Charger | Jump Start Avoidance | Battery Management Maintenance Free | Patented Design, Optimized for Maximum Performance in scattered light and extreme weather conditions with Integrated charge controller

CUSTOMER BENEFITS

Light Duty: Recommended for a trailer that uses a starter battery to power the liftgate. ($\leq 2,500$ lbs capacity)

Phillips' Solar 110W Liftgate Panel

110W Panel (73.66 x 14.8 in | 1871 x 376 mm)

**Optimized TS15
Charge Controller
with Fuse**

**Battery Cable
2.5' 8 AWG**

**Home Run Cable
50' 12 AWG**
