

120W Liftgate Kit

AVAILABLE NOW

PN: 79-91385

Introducing groundbreaking solar technology with patented flexibility and lightweight Mono cSi panels. These panels, **50% more durable than standard alternatives**, redefine reliability in renewable energy. The advanced technology not only saves fuel but also eliminates jump starts, extends battery life, and increases power to offset parasitic loads. Embrace a new era of efficient and sustainable energy solutions.

Phillips' Solar 120W Liftgate Kit

(20' & 10' cables)

67.17 in × 17.36 in (1706 mm × 441 mm)

TECHNOLOGY

Industry-leading power output • Superior low-sun angle performance in all light conditions • Designed and engineered in USA • Outstanding aesthetics and aerodynamics • Redundancy with grid design • Robust panel integrity • Engineered for extreme conditions, including military environments • Lightweight and flexible

PRODUCT FEATURES

Peel-and-stick adhesive, non-invasive installation avoids roof or surface penetration • Easy to Install • Optimized Charge Controller • Fully Integrated Merlin™ Solution with Patented Design

CUSTOMER BENEFITS

Light Duty: Recommended for a trailer that uses a starter battery to power the liftgate. (≤ 2,500 lbs capacity)

October 2025

Optimized TS15
Charge Controller with Fuse

Battery Cable
10' 8 AWG

Home Run Cable
20' 12 AWG
