

360W Class 8 Kits

AVAILABLE NOW

PN: 79-92643

Introducing groundbreaking solar technology with patented flexibility and lightweight Mono cSi panels. These panels, **50% more durable than standard alternatives**, redefine reliability in renewable energy. The advanced technology not only saves fuel but also eliminates jump starts, extends battery life, and increases power to offset parasitic loads. Embrace a new era of efficient and sustainable energy solutions.

Phillips' Solar 360W Class 8 Kits

2x panels per kit

Per panel: 67.2 in x 24.7 in (1706 mm x 627 mm)

TECHNOLOGY

Industry-leading power output • Superior low-sun angle performance in all light conditions • Designed and engineered in USA • Outstanding aesthetics and aerodynamics • Redundancy with grid design • Robust panel integrity • Engineered for extreme conditions, including military environments • Lightweight and flexible

PRODUCT FEATURES

Peel-and-stick adhesive, non-invasive installation avoids roof or surface penetration • Easy to Install • Optimized Charge Controller • Fully Integrated Merlin™ Solution with Patented Design

CUSTOMER BENEFITS

This kit can save fuel, reduce idle times, reduces IPU usage, effectively eliminate jump starts, extend battery life, increase reliability and increase power available to offset parasitic loads. It also provides drivers with the extra power to run full hotel loads reducing the number of auto-start features.

RWP30 Charge Controller

Battery Cable
2.5' 8 AWG

Home Run Cable
50' 12 AWG

Offset Cable
6' 12 AWG
